THE NEW YORK CITY AREA	1
OCCUPATIONAL WAGE STRUCTURE	1
TABLES:	
Average earnings for selected occupations studied on an area basis -	
A-1 Office occupations	3
A-2 Professional and technical occupations	12
A-3 Maintenance and power plant occupations	13
A-4 Custodial, warehousing, and shipping occupations	16
Average earnings for selected occupations studied on an industry basis* -	
B-2071 Candy and other confectionery products	19
B-2337 Women's and misses' coats and suits	20
B-235 Millinery	21
B-336 Foundries, nonferrous	22
B-342 Cutlery, hand tools, and hardware	22
B-3444 Sheet-metal work	23
B-3463 Stamped and pressed metal products	23
B-3468 Electroplating, plating, and polishing	24
B-35 Machinery industries:	
Machinery	24
Paper and printing machinery	26
Machine-tool accessories	26
B-3661 Radio, television, and related products	27
B-40 Railroads	28
B-63 Insurance carriers	28
Union wage scales for selected occupations -	
C-15 Building construction	29
C-205 Bakeries	29
C-2082 Malt liquors	29
C-27 Printing	29
C-41 Local transit operating employees	30
C-42 Motortruck drivers and helpers	30
C-44 Ocean transport - unlicensed personnel	31
C-446 Stevedoring	32
C-58 Restaurants and cafeterias	32
C-591 Drug stores	32
C-651 Building service	33
C-7011 Hotels	33
Entrance rates -	
D-1 Minimum entrance rates for plant workers	34
Wage practices -	
E-1 Shift differential provisions	35
E-2 Scheduled weekly hours	36
E-3 Paid holidays	36
E-4 Paid vacations	37
E-5 Paid sick leave	38
E-6 Nonproduction bonuses	40
E-7 Insurance and pension plans	40
APPENDIX:	
Scope and method of survey	41
INDEX	43

* NOTE - Additional occupational earnings reports are available upon request for children's stitchdown shoes (August 1951), women's cement process shoes - slip lasted (August 1951), women's cement process shoes - conventional lasted (August 1951), and ferrous foundries (June 1951).

Introduction ^{1/}

The New York City Area is 1 of 40 major labor markets in which the Bureau of Labor Statistics is currently conducting occupational wage surveys. Occupations common to a variety of manufacturing and nonmanufacturing industries were studied on a community-wide basis. Cross-industry methods of sampling were thus utilized in compiling earnings data for the following types of occupations: (a) office; (b) professional and technical; (c) maintenance and power plant; (d) custodial, warehousing, and shipping. In presenting earnings information for such jobs (tables A-1 through A-4) separate data have been provided wherever possible for individual broad industry divisions.

Occupations characteristic of particular, important, local industries were studied on an industry basis, within the framework of the community survey. ^{2/} Earnings data for these jobs have been presented in Series B tables. Union scales (Series C tables) are presented in lieu of (or supplementing) occupational earnings for several industries or trades in which the great majority of the workers are employed under terms of collective-bargaining agreements, and the contract or minimum rates are indicative of prevailing pay practices.

Data were collected and summarized on shift operations and differentials, hours of work, and supplementary benefits such as vacation and sick leave allowances, paid holidays, non-production bonuses, and insurance and pension plans.

The New York City Area

Total population of the 5 boroughs comprising New York, the world's largest city, was approximately 7,800,000 in 1950.

Nonagricultural employment in New York City was estimated to total more than 3,500,000 in January 1952. Factory employment was at a peak level with over 1,000,000 workers. About three-fourths of these workers were employed in establishments producing nondurable goods. ^{3/} Apparel firms, employing more than 350,000 workers, constituted the most important manufacturing industry, numerically. An additional 118,000 workers were engaged in printing and publishing, and about 77,000 were

employed in food processing industries. Among durable-goods industries, metalworking establishments accounted for a fourth of the 250,000 workers. Establishments manufacturing non-electrical machinery employed about 38,000 workers.

The city's importance in the field of trade made it especially susceptible to the Nation-wide buying slump that followed the post-Korea boom. Department store sales had declined nearly 20 percent from the previous year. Nevertheless, New York's retail establishments employed approximately 464,000 workers in January 1952 and another 365,000 were employed in wholesale concerns.

New York handled about 40 percent of the Nation's exports and nearly half its imports. About 340,000 workers were employed by transportation, communication, and other public utilities industries. Firms furnishing personal and business services, technical services, and entertainment gave employment to more than 550,000 workers.

Contractual agreements between management and labor organizations affected nearly 85 percent of the plant workers in the firms within scope of the study. In manufacturing, 9 of 10 workers were employed in establishments having written agreements with unions; in nonmanufacturing, 8 of 10 were in plants with labor contracts. Nearly 95 percent of the plant workers in the public utilities group were employed in unionized firms; more than 85 percent in services, 60 percent in retail trade, and 70 percent in wholesale trade. Contracts covering office workers were less significant, with only about 15 percent employed in establishments with written agreements covering office workers. However, about a third of the clerical workers in nondurable goods manufacturing firms, two-thirds in the utilities division, and two-fifths in retail trade were in organized establishments.

Occupational Wage Structure

Wages and salaries of nearly all New York plant and office workers were formally adjusted upward between January 1950, the base date for the Wage Stabilization Board's 10 percent "catch-up" wage increase formula and the time of the survey. These increases followed the same general pattern prevalent in other areas - scattered increases in early 1950 and then an acceleration in the later months prior to the effective date of wage controls. At the time of the survey, only a few of the establishments studied had wage petitions pending before the Wage Stabilization Board. Since the date of the Bureau's previous study in New York - April 1951 - a number of industry-wide agreements were completed which provided wage increases to large blocs of workers.

^{1/} Prepared in the Bureau's regional office in New York, N. Y., by Norman J. Samuels under the direction of Frederick W. Mueller, Regional Wage and Industrial Relations Analyst. The planning and central direction of the program was carried on in the Bureau's Division of Wages and Industrial Relations.

^{2/} See appendix for discussion of scope and method of survey.

^{3/} See appendix table for listing of durable- and nondurable-goods industries.

In the food and food products industry, 4,000 bakery and confectionery workers received a 10 percent increase. Other increases were granted to 3,000 employed in the ice cream industry, 16 cents an hour; and 15,000 milk dealer workers, \$10 a week. The Nation-wide meat packers agreement resulted in an increase of 11 cents an hour. Among textile workers, 17,000 in printing, dyeing, and finishing had their hourly rates adjusted by 6 cents. In the apparel industry, 65,000 women's cloak and suit workers received an increase in piece rates; 8,000 furriers got \$3 to \$6 a week; and 8,000 millinery workers received a 5 percent cost-of-living increase. About 20,000 building service employees were granted increases of from \$2.50 to \$4 a week as a result of collective bargaining. In transportation, more than 50,000 maritime workers received increases of 6.2 percent in November or December 1951, and longshoremen got 10 cents an hour above their base rates. Most of the public utilities and communications workers had received increases since April 1951. About 35,000 hotel workers had their weekly rates increased \$1.20 to \$4 a week.

Wage rates for time workers were determined according to formalized rate structures in firms employing about 80 percent of the plant workers and 70 percent of the office workers. Among all industries the predominant structure provided rate ranges for individual occupations. In nondurable-goods manufacturing and service industries, however, firms with single-rate jobs employed over 50 percent of the plant workers.

In durable-goods manufacturing and retail trade less than 20 percent of the plant workers were in firms with a single rate for each occupation. Practically all formal rate structures covering office workers provided for a range of rates. Office salaries were determined on an individual, rather than an occupational basis, in firms employing nearly half the clerical workers in manufacturing, wholesale trade, and services.

Established minimum rates for inexperienced plant workers were part of the formalized wage structure in most New York firms. Although the minima ranged from under 50 cents an hour to more than \$1.50 for all industries, none was reported below 75 cents in the manufacturing, public utilities, and wholesale trade groups. Among manufacturing firms, the minima varied by size of establishment. More than two-thirds of the workers in the large durable-goods firms (500 or more employees) and more than half the workers in nondurable-goods firms of comparable size were employed in establishments with minimum

entrance rates of \$1 or more. In establishments with 101 to 500 employees, minimum rates of \$1 or more prevailed in durable-goods firms employing 46 percent of the workers and in nondurable-goods firms employing a fourth of the workers. About half the workers in public utilities and wholesale trade were in establishments with minimum rates of \$1 or more. In retail trade and services the minima were under \$1 in firms employing about 85 percent of the workers.

Average salaries of office workers were generally higher in manufacturing than in nonmanufacturing industries, whereas the reverse held for average hourly earnings of the custodial, maintenance, and warehousing jobs studied. In 15 of 25 office job categories permitting comparison, salaries for women were higher in manufacturing than in nonmanufacturing firms, and the same was true for 8 of 14 office jobs for men. In 17 of 29 plant jobs where comparisons were possible, average hourly earnings were higher in nonmanufacturing than in manufacturing industries, and among manufacturing industries, 85 percent of the jobs showed higher average rates in nondurable than in durable-goods establishments.

About a sixth of the workers in manufacturing industries were employed on extra shifts and virtually all such workers were paid a differential over day- (first) shift rates. Among durable-goods establishments, the differential was usually expressed in percentage form: 10 percent for 4 of 10 second shift workers and 15 percent for another three-tenths of the workers. Premium pay for shift work among nondurable-goods establishments was usually 5 or more cents an hour for both second and third shifts. New York's machinery industry operated only one extra shift and differentials of 10 to 15 percent prevailed for work on this shift.

The workweek for virtually all women office workers was 40 hours or less, with almost half scheduled to work a 35-hour week. Approximately a third of the women clerical workers in durable manufacturing, retail trade, and services, and about a fourth in wholesale trade were on a 40-hour week. There had been no lengthening of the workweek for plant workers since the previous study - 40 hours continued to be the predominant work schedule. However, 1 of 8 plant workers in durable-goods industries were employed in factories with a workweek of 44 hours or more. In nonmanufacturing, about 35 percent of the plant workers in the utilities group and nearly 30 percent in retail trade were scheduled to work more than 40 hours a week.

Table A-1: *Office Occupations*

(Average straight-time weekly hours and earnings 1/ for selected occupations studied on an area basis in New York, N. Y., by industry division, January 1952)

1/ The study covered establishments with more than 20 workers engaged in manufacturing candy and other confectionery products (Group 2071) as defined in the Standard Industrial Classification Manual (1945 edition) prepared by the Bureau of the Budget. Data relate to a February 1952 payroll period.

2/ Excludes premium pay for overtime and night work.

3/ Insufficient data to permit presentation of separate averages by method of wage payment.

(a) All or predominantly time workers.

(b) All or predominantly incentive workers.

1/ The study covered regular (inside) and contract shops with 8 or more workers in part of industry group 2337 as defined in the Standard Industrial Classification Manual (1945 edition) prepared by the Bureau of the Budget. Establishments manufacturing fur coats or single skirts were excluded from the study. Cutting shops with 4 or more workers were included. Data relate to a September 1951 payroll period.

2/ Excludes premium pay for overtime and night work.

3/ Insufficient data to permit presentation of separate averages by method of wage payment; all or predominantly time workers.

4/ Workers were distributed as follows: 29 at \$4 to \$4.20; 27 at \$4.20 to \$4.40; 57 at \$4.40 to \$4.60; 52 at \$4.60 to \$4.80; 1 at \$4.80 to \$5; 1 at \$5 to \$5.20; 23 at \$5.40 to \$5.60; and 24 at \$5.60 to \$7.60.

5/ Workers were distributed as follows: 59 at \$4 to \$4.20; 52 at \$4.20 to \$4.40; 69 at \$4.40 to \$4.60; 41 at \$4.60 to \$4.80; 35 at \$4.80 to \$5; and 28 at \$5.20 to \$7.60.

1/ The study covered establishments with 8 or more workers in the millinery industry (Group 235) as defined in the Standard Industrial Classification Manual prepared by the Bureau of the Budget. Data relate to a March 1952 payroll period.

2/ Excludes premium pay for overtime and night work.

3/ Insufficient data to permit presentation of separate averages by method of wage payment.

(a) All or predominantly time workers.

(b) All or predominantly incentive workers.

1/ The study covered establishments with more than 20 workers engaged in the manufacture of nonelectrical machinery (Group 35) as defined in the Standard Industrial Classification Manual (1945 edition) prepared by the Bureau of the Budget; machine-tool accessory establishments (Group 3543) with more than 7 workers were included. Data relate to a December 1951 payroll period.

2/ Excludes premium pay for overtime and night work.

3/ Includes data for paper and printing machinery (Group 3554 and 3555) and machine-tool accessory establishments (Group 3543) for which separate data are also presented.

4/ Insufficient data to permit presentation of separate averages by method of wage payment.

(a) All or predominantly time workers.

(b) All or predominantly incentive workers.

5/ Includes data for operators of other machine tools in addition to those shown separately.

1/ The study covered establishments with more than 20 workers engaged in the insurance industry (Group 63) as defined in the Standard Industrial Classification Manual (1949 edition) prepared by the Bureau of the Budget.

2/ Hours reflect the workweek for which employees receive their regular straight-time salaries and the earnings correspond to these weekly hours.

Occupational Wage Survey, New York, N. Y., January 1952
U.S. DEPARTMENT OF LABOR
Bureau of Labor Statistics

C: Union Wage Scales

29

(Minimum wage rates and maximum straight-time hours per week agreed upon through collective bargaining between employers and trade-unions. Rates and hours are those in effect on dates indicated. Data relate to the 5 boroughs unless otherwise indicated. Comprehensive listings of union scales for bakeries, building construction, motortruck drivers and helpers, and printing for July 1, 1951 are available on request. Similar information for these industries will be published for July 1, 1952.)

Table C-15: *Building Construction*

April 2, 1952

Classification	Rate per hour	Hours per week
Bricklayers	\$3.250	35
Carpenters	3.000	35
Electricians	3.300	35
Painters	2.830	35
Plasterers	3.500	30
Plumbers	1/ 3.150	35
Building laborers	2.150	35

1/ Brooklyn and Queens, \$3.100.

1/ Wage scales and hours per week are those in effect on December 16, 1951, for Atlantic and Gulf Coast ship operators under contracts with the National Maritime Union, CIO. Details of changes are given in the footnotes following. The Wage Stabilization Board approved similar changes for members of the Seafarers' International Union, AFL, effective November 1, 1951.

- On all vessels carrying explosives in 50-ton lots or over, and on all vessels carrying sulphur, cement, cyanide, etc., in bulk lots of 1,000 tons or over, 10% of basic monthly wages is added while such cargo is aboard, or is being loaded or unloaded.
- On vessels operating in described areas of China and Korean coastal waters, a per diem allowance of \$2.50 and an "Area Bonus" of 100% of daily basic wages is added.
- On vessels attacked, fired upon or struck by mines of either belligerents, resulting in physical damage to the vessel or injury to a crew member, a "Vessel Attack Bonus" of \$125.00 shall be paid to each crew member.

2/ The maximum straight-time hours which may be worked per week at sea. At sea, watch men normally work 56 hours per week with 16 hours (Saturday and Sunday) paid at the overtime rate. Day men at sea are given compensation (which is included in this basic monthly wages) in lieu of Saturday and Sunday work at the overtime rate. In port both day men and watch men receive overtime rates for work on Saturday and Sunday.

3/ The maximum straight-time hours which may be worked per week at sea and in port. Members of the stewards' department normally work 56 hours per week at sea with 16 hours (Saturday and Sunday) paid at the overtime rate. In port overtime is paid for work on Saturday and Sunday.

4/ Wage scales and hours per week are those in effect on July 15, 1951, as approved by the Wage Stabilization Board.

Table C-44b: *Stevedoring*

January 2, 1952

Classification	Rate per hour	Hours per week
Longshoremen:		
General cargo, including barrel oil when part of general cargo, and general cargo hauled in refrigerator space with above-freezing temperature	\$2.100	40
Bulk cargo, ballast, and all coal cargoes, coal loading and trimming; cement and lime in bags	2.150	40
Hides, wet; creosoted poles, ties, and shingles; cashew oil, naphthalene and soda ash in bags	2.250	40
Refrigerator space cargo—meats, fowls, and other similar cargo transported at or below freezing temperature; rates to be paid full gang	2.300	40
Kerosene, gasoline and naphtha in cases and barrels, when loaded by case oil gangs, and with a fly	2.300	40
Explosives and damaged cargo	4.100	40

Occupational Wage Survey, New York, N. Y., January 1952
U.S. DEPARTMENT OF LABOR
Bureau of Labor Statistics

Appendix - Scope and Method of Survey

With the exception of the union scale of rates, information presented in this bulletin was collected by visits of field representatives of the Bureau to representative establishments in the area surveyed. In classifying workers by occupation, uniform job descriptions were used; these are available upon request.

Six broad industry divisions were covered in compiling earnings data for the following types of occupations: (a) office clerical, (b) professional and technical, (c) maintenance and power plant, and (d) custodial, warehousing, and shipping (tables A-1 through A-4). The covered industry groupings are: manufacturing; transportation (except railroads), communication, and other public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and services. Information on work schedules and supplementary benefits also was obtained in a representative group of establishments in each of these industry divisions. As indicated in the following table only establishments above a certain size were studied. Smaller establishments were omitted because they furnished insufficient employment in the occupations studied to warrant their inclusion.

Among the industries in which characteristic jobs were studied, minimum size of establishment and extent of the area covered were determined separately for each industry (see following table). Although size limits frequently varied from those established for surveying cross-industry office and plant jobs, data for these jobs were included only for firms meeting the size requirements of the broad industry divisions.

A greater proportion of large than of small establishments was studied in order to maximize the number of workers surveyed with available resources. Each group of establishments

of a certain size, however, was given its proper weight in the combination of data by industry and occupation.

The earnings information excludes premium pay for overtime and night work. Nonproduction bonuses are also excluded, but cost-of-living bonuses and incentive earnings, including commissions for salespersons, are included. Where weekly hours are reported as for office clerical, they refer to the work schedules (rounded to the nearest half-hour) for which the straight-time salaries are paid; average weekly earnings for these occupations have been rounded to the nearest 50 cents. The number of workers presented refers to the estimated total employment in all establishments within the scope of the study and not to the number actually surveyed. Data are shown for only full-time workers, i.e., those hired to work the establishment's full-time schedule for the given occupational classification.

Information on wage practices refers to all office and plant workers as specified in the individual tables. It is presented in terms of the proportion of all workers employed in offices (or plant departments) that observe the practice in question, except in the section relating to women office workers of the table summarizing scheduled weekly hours. Because of eligibility requirements, the proportion actually receiving the specific benefits may be smaller. The summary of vacation and sick leave plans is limited to formal arrangements. It excludes informal plans whereby time off with pay is granted at the discretion of the employer or other supervisor. Sick leave plans are further limited to those providing full pay for at least some amount of time off without any provision for a waiting period preceding the payment of benefits. These plans also exclude health insurance even though it is paid for by employers. Health insurance is included, however, under tabulation for insurance and pension plans.

ESTABLISHMENTS AND WORKERS IN MAJOR INDUSTRY DIVISIONS AND IN SELECTED INDUSTRIES IN NEW YORK, N.Y., 1/
